

EV-D12060-A

60W 120V to 12V Dimmable Transformer UL approved

This is an Electronic transformer, with many built in safety protections, so it will not output any voltage until a minimum HALOGEN OR INCANDESCENT load is present, min 10W for the 60W. It will not work with LED Load.

- Fully dimmable With standard TRIAC dimmers
- Single Input 120VAC, +-6%, 50/60 Hz, 0.5A, PF>0.98
- Output 11.5V +-6%, min load 10W, max load 60W
- Approvals: **UL**, cUL class 2, CE, FCC, RoHS
- Suitable for Halogen Downlights.
- Flying leads for rapid connection
- IP20 For dry location
- Protection: Short-Circuit, Overload, Over Heat
- Soft start to prolong lamp life
- Auto-restart function when fault condition is removed
- -10C to +40C, full load, max case 65C. 20 to 95% RH NC
- Size: 2.56" L x 1.38" W x 0.91" H (65mm L x 35mm W x 23mm H)
- Shell material: Plastic
- 2 year warranty
